## About Me

I am a curious and hardworking Software Engineering student who enjoys learning new technologies and building practical solutions. I love working on projects where I can combine creativity with technical skills, and I'm always looking for opportunities to grow, collaborate, and contribute to meaningful work.

---

## Education

**B.Sc. in Software Engineering** — Wollo University, Kombolcha  
(Currently pursuing)

Key courses: Web Technologies, Object-Oriented Programming, Database Systems, Mobile App Development

---

## Skills

- **Programming:** HTML, CSS, JavaScript, PHP, Python, Java, C++
  - **Tools & IDEs:** Visual Studio Code, Eclipse, NetBeans
  - **Strengths:** Problem-solving, debugging, teamwork, communication, user-focused design
- 

## Projects

**Hotel Management System** — Web Application (Flask + MySQL)

- Designed and developed a hotel management system that handles room booking, check-in/check-out, and customer records.
- Integrated MySQL for reliable data storage and retrieval.

- Implemented admin and staff dashboards to manage reservations, customers, and payments.
  - Focused on user-friendly design and smooth workflow for hotel staff and guests.
- 

## What I Bring

- I pick up new skills quickly and enjoy solving problems.
  - I work well in a team and can explain technical ideas in a simple way.
  - I'm passionate about creating software that makes life easier and more efficient.
-
