About Me

I am a curious and hardworking Software Engineering student who enjoys learning new technologies and building practical solutions. I love working on projects where I can combine creativity with technical skills, and I'm always looking for opportunities to grow, collaborate, and contribute to meaningful work.

Education

B.Sc. in Software Engineering — Wollo University, Kombolcha
(Currently pursuing)

Key courses: Web Technologies, Object-Oriented Programming, Database Systems, Mobile App Development

---

Skills

- **Programming:** HTML, CSS, JavaScript, PHP, Java, C++
- **Tools & IDEs:** Visual Studio Code, Eclipse, Phython
- **Strengths:** Problem-solving, debugging, teamwork, communication, user-focused design

---

Projects

CARA ATM System — Java Desktop Application

- Built a Java-based ATM simulator with features like withdrawal, deposit, and balance inquiry.
- Designed user authentication and reliable transaction handling.

Projects

CARA ATM System — Java Desktop Application

- Built a Java-based ATM simulator with features like withdrawal, deposit, and balance inquiry.
- Designed user authentication and reliable transaction handling.

- Focused on usability, error handling, and creating a simple, user-friendly interface.

(More projects and portfolio links can be added here.)

What I Bring

- I pick up new skills quickly and enjoy solving problems.
- I work well in a team and can explain technical ideas in a simple way.
- I'm passionate about creating software that makes life easier and more efficient.
